Dear Parents and Carers,

There are a number of Covid-19 cases across school and we have a large number of staff and children isolating due to a positive test and/or symptoms. As a result of this we won't be sending letters out to parents every time we have a positive case in a class as that would mean sending letters on a daily basis. Therefore, it is safe to assume that we will continue to have a number of cases in school and we expect this to continue for at least the next couple of weeks. We have procedures in place to reduce transmission and are in contact with Public Health to ensure that we are continuing to ensure that the school is as safe as possible.

The school remains open and our priority is to continue to offer on-site education and your child should continue to attend as normal if they are well. Please be reassured that for most people, coronavirus will be a mild illness.

## How to stop coronavirus (COVID-19) spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with coronavirus (COVID-19):

- get vaccinated – everyone aged 12 and over can [book COVID-19 vaccination appointments](#) now
- wash your hands with soap and water or use hand sanitiser regularly throughout the day
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards
- meet people outside and avoid crowded areas
- open doors and windows to let in fresh air if meeting people inside
- wear a face covering when it's hard to stay away from other people – particularly indoors or in crowded places
- participate in twice weekly LFD testing following national guidelines (recommended for 11 years and over). We encourage you to log your results here: <https://www.gov.uk/log-test-site-covid19-results>

## Further information

Further information is available at [nhs.uk/coronavirus](https://nhs.uk/coronavirus)

## What to do if your child develops symptoms of coronavirus (COVID-19) or tests positive for COVID-19

The most common symptoms of COVID-19 are recent onset of:

- new continuous cough and/or
- high temperature and/or
- a loss of, or change in, normal sense of taste or smell (anosmia)

If your child does develop symptoms, they should get a PCR test and remain at home at least until the result is known. [Get a free PCR test to check if you have coronavirus \(COVID-19\) - GOV.UK \(www.gov.uk\)](https://www.gov.uk). If positive, the child should isolate until at least 10 days after their symptoms appeared.

If you are concerned about your child's symptoms, you can seek advice from NHS 111 at <https://111.nhs.uk/> or by phoning 111.

If your child has a positive test result but does not have symptoms they should stay at home and self-isolate for 10 days from the date the positive test was taken.

### **Instructions for people who live in the same household as someone with COVID-19**

From 16 August, [you will not be required to self-isolate if you are a contact of someone who has tested positive for COVID-19](#) and any of the following apply:

- you are fully vaccinated with an MHRA approved COVID-19 vaccine in the UK, and at least 14 days have passed since you received the vaccine.
- you are below the age of 18 years 6 months
- you have taken part in or are currently part of an approved COVID-19 vaccine trial
- you are not able to get vaccinated for medical reasons

NHS Test and Trace will contact you to let you know that you have been identified as a contact and check whether you are legally required to self-isolate. Even if you do not have symptoms, [you will be advised to have a PCR test as soon as possible](#).

Even if you are vaccinated, you can still be infected with COVID-19 and pass it on to others. If you are identified as a contact of someone with COVID-19 but you are not required to self-isolate, you can help protect others by:

- PCR testing for all adults and pupils if they are a close contact of a positive case in their household
- Daily LFT testing at home for 7 days for any adult or pupil in key stage 2 (year 3) or above who is a household contact of a positive case and is exempt from isolation and continues to attend school. The testing of primary age pupils is at parental discretion. Testing should start from the day the household member has symptoms or if they don't have symptoms from when they tested positive
- limiting close contact with other people outside your household, especially in enclosed spaces
- wearing a face covering in enclosed spaces and where you are unable to maintain social distancing
- limiting contact with anyone who is clinically extremely vulnerable
- taking part in [regular LFD testing](#)

You should follow this advice while the person in your household with COVID-19 is self-isolating. Those who are [clinically extremely vulnerable](#) should be supported to minimise their contact with other people in the household during this period, regardless of whether others have symptoms or not.

You may be eligible for a Test and Trace Support Payment, for more information please see: [www.gov.uk/test-and-trace-support-payment](https://www.gov.uk/test-and-trace-support-payment)

### **Help, support, and further information.**

To help you comply with the requirement to self-isolate, the County Durham Together Community Hub can provide access to essential supplies, financial support and emotional support as well as other services. Please visit [durham.gov.uk/covid19help](https://durham.gov.uk/covid19help) or call the Community Hub on 03000 260260 for further details.

There is also support available the coronavirus section via [durhamlocate.org.uk](https://durhamlocate.org.uk)

Kind regards,  
Paul Newton  
Headteacher
